Professional Summary

Full-Stack Software Engineer with hands-on experience building responsive web applications and REST APIs using React, Django, Python, and PostgreSQL. Experienced across frontend development, backend engineering, database design, API integration, authentication, performance optimization, testing, and deployment. Strong focus on building maintainable, user-focused software and delivering features across the full software development lifecycle.

Skills

Languages: JavaScript, Python, SQL, HTML5, CSS3

Frontend: React, Bootstrap, Responsive Web Design

Backend: Django, Django REST Framework, REST APIs, Authentication & Authorization

AI: Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents

Databases: PostgreSQL, MySQL

Tools: Docker, Git, GitHub, Nginx, Postman

Work Experience

Software Engineer Intern **September 2024 – May 2025**

Cruxx AI — New Delhi, India

- Developed full-stack application features using React, Django, Python, and PostgreSQL across frontend and backend workflows.
- Built and integrated REST APIs, authentication flows, and database-backed functionality to support production application features.
- Improved frontend responsiveness and usability by optimizing UI workflows, API integration, and client-side behavior.
- Collaborated with developers and stakeholders throughout feature development, debugging, testing, deployment, and Git-based version control.
- Contributed across the software development lifecycle, from implementation and testing through deployment and maintenance.

Education

Bachelor of Technology (B.Tech) **2025**

Computer Science Engineering (Artificial Intelligence & Data Science)

Padmabhooshan Vasantraodada Patil Institute of Technology (PVPIT), Budhgaon, Sangli

CGPA: 7.5/10

Diploma in Computer Science Engineering **2022**

Padmabhooshan Vasantraodada Patil Institute of Technology (PVPIT), Budhgaon, Sangli

Percentage: 84%

Project Work

RigSmith | Full-Stack PC Builder & Compatibility Platform

Python, Django, React, CSS3, Docker, PostgreSQL, SVG

- Built a responsive full-stack PC builder featuring a live SVG hardware blueprint with interactive component selection and compatibility visualization.

- Developed Django REST APIs for authentication, hardware catalog management, configuration persistence, and affiliate click tracking.
- Engineered an automated background price monitoring service with personalized HTML email alerts.
- Containerized frontend and backend using Docker and configured Nginx for deployment.

SkillSphere | Learning Management System

Python, Django, JavaScript, Bootstrap, PostgreSQL

- Developed a Learning Management System supporting course creation, enrollment, progress tracking, and instructor dashboards.
- Implemented secure authentication, role-based authorization, protected routes, and session management.
- Built responsive Bootstrap interfaces integrated with Django and PostgreSQL.

SentimentSphere | AI-Powered Sentiment Analysis Dashboard

Python, Django, JavaScript, Bootstrap, PostgreSQL, Chart.js, Highcharts

- Built an end-to-end sentiment analytics platform for processing customer feedback into actionable business insights.
- Developed dashboards for sentiment distribution, response rates, NPS tracking, rating trends, and comparative analytics.
- Designed REST-driven data pipelines and advanced filtering for responsive KPI visualization.

Awards and Certificates

- Complete Web Development Bootcamp — Udemy (2024)
- Machine Learning with Python — YHills Trainings (2024)
- Java Programming with JDBC — AptTech Solutions (2024)
- Python from Beginner to Advanced — Udemy (2023)

Volunteer Experience

NIRMIT 2024 — Event Manager & Treasurer

- Organized and managed a large-scale inter-college engineering event with participation from more than 20 colleges.
- Coordinated events across nine engineering departments.
- Managed budgeting, financial planning, and resource allocation to ensure smooth event execution.
